SAFETY **STARTS WITH KNOWLEDGE**

ABOUT US

kNm Hydraulikk have over 25 years experience with the design, sale and rental of tools and known for being an experienced and knowledgeable supplier of products and services within bolt tension and flange-work. Our expertly trained staff coupled with our extensive product portfolio puts us in a strong position to solve our clients bolting, flange work and hydraulic needs.

We are a certified Enerpac-Hydratight supplier and offer their torque tools, tensioner tools and standard hydraulics for both sale and rental. The products we offer are innovative and market leaders within their field.

kNm Hydraulikk put their customer first and can offer a vast array of technical support services from calibration, services and repairs.

OUR KNOWLEDGE - YOUR SAFETY is a slogan we stand for. We aim to build relationships that last and willing to go the extra mile to ensure client satisfaction and this is evident as the majority of our clients have been with us long term.

Our Rental Park

The rental park we have available enables us to cover several clients simultaneously. The equipment is used offshore on a daily basis and has been developed over a long period of time to withstand the harsh environment that we have on the Norwegian Continental Shelf.

We have a large selection of tools in our rental park that facilitate work with the assembly, disassembly and maintenance of flanges and bolts. For assembly work and maintenance of flanges, we offer the Enerpac Equalizer range of mechanical and hydraulic flange spreaders and flange adjustment tools. When it comes to subsea bolting and tensioning, it is very important that the equipment being used is easy to operate by divers. Through our partner Enerpac Hydratight we offer most dimensions within subsea tensioning equipment for rental.

kNm Hydraulikk has developed a number of products within HSE that can be made available for rental. When using hydraulic torque wrenches, falling objects and injuries are the greatest potential dangers within the field. In our rental park, we offer equipment for various HSE needs, such as safety wrenches and equipment for bolt tightening, preventing dangers such as falling objects and crush injuries. We also offer manually calibrated torque wrenches for rental for smaller bolt dimensions.

Why Rent Tools?

Tight project **timeline** & budget

When budget and project schedule is tight, it is often easier and faster to approve a weekly or monthly tool rental expense within a operating budget.

Asset management **burden**?

The ability to store, repair, insure and manage inventory is not an option for all companies. Many businesses prefer kNm Hydraulikk to carry the burden of owning assets

Rare & **specialized** tools?

Determining whether the tools can be used again in the future (and how often) has a significant impact on the financial comparison. For instance, the hydraulic cylinders and torque wrenches may not fit the next application making rental the better option for those

Low Profile Torque Wrench - W

Low Profile Torque Wrenches in the W-series from Enerpac have a superior strength to size ratio and provide easy access to difficult to reach applications without sacrificing endurance.

The X-Edition drive units, cassettes and most accessories are compatible with standard edition tools. These wrenches are ATEX-certified and have been developed with a tough manifold design with added safety feature for enhanced operator safety.

Square Drive Torque Wrench - S

Torque Wrenches in the S-series have a compact, high-strength uni-body construction that provides small operating radius without sacrificing the endurance of the tool. They have been developed with a 360° click-on reaction arm with quick release lever that provides easier handling, even when wearing gloves

Low Profile Torque Wrench - RTX

Low profile torque wrenches in the RTX-series from Atlas Copco combine high power-to-weight ratio, durability and hands-free operation. The result is a tool that is perfectly suited for low clearance applications that require high torque.

Use the RTX torque wrenches with standard set up or customize with accessories.

Pneumatic Torque Wrench - PTW

Enerpac Pneumatic torque wrenches are tough and reliable tools that are designed to provide fast, safe, and simple fastening for applications that require controlled bolting solutions.

The pneumatic torque wrenches are robust enough to withstand tough job site conditions, and are ideal for applications with a high volume of fastenings.

Cordless Screwdriver - LDA/LAW

Gedore LDA/LAW Solution cordless screwdrivers are made from lightweight high-performance aluminum, scores points with reliable documentation software, clear color display, low weight and maximum performance.

For maximum precision, the LDA/LAW Solution offers an optical zero-defect strategy: a sun-light-readable, digital color display visually represents the entire work process.

Torque Wrench - Dremaster

Dremaster® AM torque wrenches are lightweight and sturdy, very workshop-friendly with maximum precision even when subjected to extreme continuous use.

Most Dremometer models have separate ratchet heads, making it possible to work with or without the ratchet head function as desired.

Torque Wrench - Dremometer

Dremometer Z / SE torque wrenches from Gedore have a square drive and an integrated ratchet for extra control. Torque wrenches in the Z/SE-series have been developed with a replaceable head and a "push-button" release.

Dremometer Z and SE torque wrenches make a clicking sound when the desired torque is reached.

Torque Wrench - Stahlwille

Stahlwille Torque Wrenches are relentlessly tested, resulting in durability, strength, and longevity. These torque wrenches are used extensively in the aerospace, energy, and transport industries.

Stahlwille torque tools are designed for error-free selection of settings. They feature vibrant colour coding on the scale to easily differentiate between foot pounds and newton meters in bright sunlight or when covered by work debris.

Safety Tools - kNm Hydraulikk

kNm Hydraulikk developed the kNm Safety Wrench to reduce the risk of falling objects and crush injuries for operators.

When using hydraulic torque wrenches, these are the greatest potential hazards.

The Safety Wrench developed by kNm Hydraulikk eliminates the use of impact wrenches and prevents rotation of the nut.

Safety Tools - kNm Hydraulikk

kNm Hydraulikk developed the kNm Safety Nut to reduce the risk of falling objects and crush-danger for operators. When using hydraulic torque wrenches, these are the greatest potential hazards. kNm Safety Nut is screwed onto the bolt connector after the torque wrench is mounted, meaning that the operator does not hold the tool during operation.

kNm Safety Nut comes with both metric and inch thread. The material is aluminum or POM.

Flange Secure Grip Tools

The Equalizer™ range of patented flange spreading tools have been developed to aid and simplify the maintenance of flange joints. No longer will those tasked with separating flanges have to rely on using ropes and pulleys, podgers, tirsors, come-alongs or hammers – there is a safe, quick and effective alternative, the Equalizer™ range of spreaders. These spreaders use mechanical and hydraulic principles for separating flanges and can spread small, medium or large flange joints. Tool selection is made on the basis of the access gap between the flange faces, the flange size and the required scope of work.

RAR	Double-Acting	20 - 150 TON	50 - 250 mm
RARH	Double-Acting Hollow Plunger Cylinders	30 - 150 TON	50 - 250 mm
CULP	Ultra-Flat Cylinders with Stop Ring	10 - 100 TON	6 mm
CUSP	Ultra-Flat High-Tonnage Cylinders	10 - 1000 TON	Stroke Straight / Tilted Stroke: 7 - 17 mm / 6 - 10 mm

CYLINDERS

MODEL	TYPE	CAPACITY	STROKE
LPL	Single-Acting Low-Height Lock Nut Cylinders	60 - 500 TON	45 - 50 mm
RSM & RCS	Single-Acting Low-Height Cylinders	5 - 150 TON	6 - 62 mm
RLT	Single-Acting Low-Height Telescopic Cylinders	4,4 - 74,1 TON	17 - 40 mm
RT	Single-Acting Telescopic Cylinders	14 - 31 TON	270 - 600 mm
BRC/BRP	Single-Acting Pull Cylinders	2,5 - 50 TON	127 - 154 mm
RCH	Single-Acting Hollow Plunger Cylinders	13 - 95 TON	8 - 155 mm
RRH	Double-Acting Hollow Plunger Cylinders	30 - 145 TON	38 - 258 mm
RR	Double-Acting Long Stroke Cylinders	10 - 520 TON	57 - 1219 mm

Hand Pumps

Model	Pump Type	Useable Oil Capacity	Max. Flow at Rated Pressure	Valve Operation	Operating Pressure	Weight
P141	Single Speed	327 cm ³	0,90 cm ³ /stroke	Manual	700 bar	2,4 KG
P142	Two Speed	327 cm ³	0,90 cm ³ /stroke	Manual	700 bar	2,4 KG
P391	Single Speed	901 cm ³	2,47 cm ³ /stroke	Manual	700 bar	4,1 KG
P392	Two Speed	901 cm ³	2,47 cm ³ /stroke	Manual	700 bar	4,1 KG
P80	Two Speed	2200 cm ³	2,46 cm ³ /stroke	Manual	700 bar	10,7 KG
P84	Two Speed	2200 cm ³	2,46 cm ³ /stroke	Manual	700 bar	11,8 KG
P801	Two Speed	4100 cm ³	2,46 cm ³ /stroke	Manual	700 bar	14,1 KG
HPT1500	Two Speed	2540 cm ³	0,61 cm ³ /stroke	Manual	1500 bar	9,0 KG
P2282	Two Speed	983 cm ³	0,61 cm ³ /stroke	Manual	2800 bar	6,4 KG

Components - Hoses

30,0 M	1500 bar

*Different couplers available

Hose Reels

TYPE	Operating Pressure
Single Hose Reel	1500 bar
Twin Hose Reel	700 bar
Hose Reel Stand	*No fittings

Components - Gauges

MODEL	T- Series
Pressure Range	0- 3500 bar
Face Diameter	162- 192 mm
Accuracy	± 0,5- 1,5%
Material	Alloy & Stainless Steel

MODEL	DGR- Series
Pressure Range	0- 1380 bar
Voltage	3 Volt (Battery)
Accuracy	± 0,25%
Display	Bar, psi, Mpa & kg/cm ²

Components - Gauges

MODEL	GA45GC
Pressure Range	0- 700 bar
Scale	Dual
Accuracy	± 0,5- 1,5%
Material	Alloy & Stainless Steel

MODEL	G- Series
Scale	Dual
Pressure Range	0- 1000 bar
Face Diameter	63- 100 mm
Accuracy	± 1,0- 1,5%
Display	Bar, psi, Mpa & kg/cm2

Components - Manifolds

Model	SFM - Series
Compatibility	Single-Acting
Inlet Connection	1 x Power Pump
Outlet Connection	Max. 4 Cylinders
Min. Pump Flow	0,82 l/min
Max. Operating Pressure	700 bar

Model	AMGC41	AMGC42
Compatibility	Single Acting	Double Acting
Inlet Connection	1	1
Outlet Connection	4	4
Max. Operating Pressure	700 bar	700 bar
Weight	10,8 KG	17,4 KG

Components - Manifolds

Model **AM21**

Inlet Ports	2
Outlet Ports	2
Oil Ports	3/8" NPTF
Max. Operating Pressure	700 bar

Model **AM41**

Inlet Ports	1
Outlet Ports	4
Oil Ports	3/8" NPTF
Max. Operating Pressure	700 bar
